

# Size guide

for Handicare's SystemRoMedic™ lifting slings.

English

SystemRoMedic™ is a complete solution for easy transfers. The concept encompasses four product areas that meet most needs in different transfer situations.

**Transfer**, between two locations. **Positioning**, within the same location.

**Support**, for mobility. **Lifting**, both manual and mechanical.

**PLEASE NOTE!**

To determine the most appropriate model, size and material for the individual user, trial fitting of lifting slings is always essential. The size guide's measurements and recommendations are only intended as an aid to selecting lifting slings. The lifting sling's seat width gives an indication of how wide the user's hips (trochanter width) can be. The user's trochanter width must be within +/- 10 cm/3.9" of the lifting sling's seat width. The lift vest's width gives an indication of the girth of the user's trunk. The user's trunk girth must be within +/- 10 cm/3.9" of the lift vest's width. The lifting sling is too large if the user's seat slides out too far at the lower opening, or if the leg supports slide forward towards the hollows of the user's knees. The lifting sling is too small if the user's face is too close to the slingbar, if the leg supports chafe at the groin, or if the sling appears to be too tight or feels too tight.

## Undivided leg supports/High and shoulder-high back
